

# Tree Spacing

**Tree Spacing:** A 200 ft tape measure is an important tool to flag you tree spacing. A second tape is useful as well.

| VARIETY        | Distance in Row (Trunk Centers) | Distance Between Rows* |
|----------------|---------------------------------|------------------------|
| Almond hybrids | 15-20 ft                        | 16-20 ft               |
| Pecan          | 35-50 ft                        | 35-50 ft               |
| Hazelnut       | 8-12 ft                         | 16-20 ft               |
| Chestnut       | 30-40 ft                        | 30-40 ft               |
| Serviceberry   | 10-12 ft                        | 16-20 ft               |
| Clove Current  | 4-6 ft                          | 10-14 ft               |
| Fig            | 6-8 ft                          | 13-16 ft               |
| Hardy Kiwi     | 8-12 ft                         | 8-10 ft                |
| Fall Raspberry | 2 ft                            | 8-10 ft                |
| Blackberry     | 3 ft                            | 8-10 ft                |
| Blueberry      | 4 ft                            | 8-10 ft                |
| Strawberry     | 1 ft staggered                  | 1.5 ft                 |

| VARIETY               | Distance in Row (Trunk Centers) | Distance Between Rows* |
|-----------------------|---------------------------------|------------------------|
| Apple: dwarf          | 8-12 ft                         | 16-20 ft               |
| Apple: semi-dwarf     | 15-18 ft                        | 16-20 ft               |
| Pear: semi-dwarf      | 14-16 ft                        | 16-20 ft               |
| Asian Pear semi-dwarf | 12-16 ft                        | 16-20 ft               |
| Peach                 | 15-20 ft                        | 16-20 ft               |
| Apricot               | 15-18 ft                        | 16-20 ft               |
| Tart/Sweet Cherry     | 14-16 ft                        | 16-20 ft               |
| Bush Cherry           | 5-8 ft                          | 13-16 ft               |
| Persimmon             | 15-20 ft                        | 16-20 ft               |
| Mulberry dwarf        | 10-12 ft                        | 16-20 ft               |
| Paw Paw               | 10-15 ft                        | 16-20 ft               |
| Jujube                | 12-15ft                         | 16-20 ft               |

**Field Adjustments** – It is common to have to make last minute or planting day adjustments due to the “urbanite” found in holes.
